IMPORTANT INFORMATION FOR APPLICANTS

Article VIII, Section 1-d-1, Texas Constitution, and Chapter 23, Subchapter D, Texas Property Tax Code, provide for appraisal of open-space land.

Land qualifies for special appraisal (1-d-1 appraisal) if it has been (1) used for agriculture for five of the preceding seven years and is currently devoted principally to agricultural use as defined by statute, (2) used to protect federally listed endangered species under a federal permit, or (3) used for conservation or restitution projects under certain federal and state statutes. The land must also be used for agriculture to the degree of intensity generally accepted in the area. The value of the land is based on the annual net income from a typical lease arrangement that would have been earned from the land during the five-year period preceding the year before the date of appraisal by an owner using ordinary prudence in the management of the land and the farm crops and livestock produced or supported on the land, including income received from hunting or recreational leases.

An individual is not entitled to have land designated for agricultural use if the land secures a home equity loan described by Article XVI, Section 50(a)(6), Texas Constitution.

If you have questions on completing this application or on the information concerning additional taxes and penalties created by a change of use of the land, you may consult the State Comptroller's Manual for the Appraisal of Agricultural Land and your appraisal district staff. The manual may be found on the Comptroller's Web site at comptroller.texas.gov/taxinfo/proptax under the section concerning appraisal manuals.

You must complete this application in full and file it with the chief appraiser before May 1 of the year you are applying for agricultural appraisal. To be accepted, this form must contain information necessary to determine the validity of the claim. If your application is approved, you do not need to file again in later years unless the chief appraiser requests a new application. The chief appraiser may disapprove the application and request additional information. The chief appraiser may deny the application and you may protest that determination to the county appraisal review board in a timely manner. If the chief appraiser requests additional information from an applicant, the information must be furnished within 30 days after the date of the request, or the application is denied. For good cause shown, the chief appraiser may extend the deadline for furnishing the information by written order for a single 15 day period.

You may file a late application up to midnight the day before the appraisal review board approves appraisal records for the year which usually occurs in July. If you file a late application and your application is approved, you must pay a penalty equal to 10 percent of the difference between the amount of tax imposed on the property and the amount that would be imposed if the property were taxed at market value.

STEP 2: Describe the property

Give legal description, abstract numbers, field numbers, or plat numbers. (You may attach last year's tax statement or notice of appraised value, or other correspondence identifying the property)

If yes, the new owner must complete all applicable questions, including Step 3 and Step 4, if the land is used to manage wildlife.	<input type="checkbox"/>	<input type="checkbox"/>
2. Last year, were you allowed 1-d-1 appraisal on this property by the chief appraiser of this appraisal district? The chief appraiser is requesting all applicable questions be answered in Step 3 and Step 4 on the following pages.	<input type="checkbox"/>	<input type="checkbox"/>
3. Is this property located within the corporate limits of a city or town?	<input type="checkbox"/>	<input type="checkbox"/>

Agricultural use includes but is not limited to, the following activities: (1) cultivating the soil; (2) producing crops for human food, animal feed, or planting seed or for the production of fibers; (3) floriculture, viticulture, and horticulture; (4) raising or keeping livestock; (5) raising or keeping exotic animals or fowl for production of human food or fiber, leather, pelts or other tangible products having a commercial value; (6) planting cover crops or leaving land idle for the purpose of participating in any governmental program or normal crop or livestock rotation procedures; (7) wildlife management; and (8) beekeeping.

Wildlife management is defined as actively using land that at the time the wildlife-management use began, was appraised as qualified open-space or timber land under Tax Code, Chapter 23, Subchapter D or E, to propagate a sustaining breeding, migrating or wintering population of indigenous wild animals for human use, including food, medicine, or recreation, in at least three of the following ways: (1) habitat control; (2) erosion control; (3) predator control; (4) providing supplemental supplies of water; (5) providing supplement supplies of food; (6) providing shelters; and (7) making census counts to determine population.

Wildlife management is also actively using land to protect federally listed endangered species under a federal permit if the land is in a habitat preserve subject to a conservation easement or part of a conservation development under a federally approved habitat conservation plan restricting the use of the land. Actively using land for a conservation or restoration project under certain federal and state statutes is wildlife management. These two types of wildlife management uses do not require showing a history of agricultural use but do require evidence identified in Step 4, Questions 4 and 5.

STEP 3: Describe the property's use
